A sub-fund of Planetary Fund - Class B EUR - LU0374938057

Management Company : Lemanik Asset Management S.A.

Objectives and investment policy

The Fund Manager takes a flexible Global Macro type of investment approach, aiming to generate absolute returns in different phases of the market by ensuring that the portfolio is adequately diversified between asset classes.

This sub-fund comprises a portfolio invested in equities, other similar transferable securities and fixed or floating rate bonds admitted to the official listing of a stock exchange or traded on another Regulated Market.

Equity type securities will mostly be from large cap issuers, without any geographic or sector limitations.

Investments in financial instruments that are unrated or are rated below investment grade may not exceed 30% of the sub-fund's assets.

The sub-fund may also invest 40% of its assets in commodities through investments in units of UCITS and other UCI, in ETFs and in other transferable securities and, to a lesser extent, through investments in commodity index derivatives.

The sub-fund may also invest up to 10% of its assets in the units of UCITS and other UCI.

The sub-fund may hold liquid financial assets, including convertible bonds, deposits and money-market instruments

In order to manage foreign exchange risks, investments in currencies other than the portfolio's reference currency may be hedged.

For the purposes of hedging risks and of efficient management and investment, the sub-fund may use derivatives traded on a regulated or over-the-counter market. Total exposure to derivatives may not exceed the sub-fund's net asset value.

Sale of shares in the sub-fund can be made on any business day.

Any income arising from the sub-fund's investments is reinvested and reflected in the value of your shares.

Risk and reward profile

This indicator represents the risk category associated with this sub-fund. Information on past performance is not a reliable indicator of future investment activity.

The risk category associated with this sub-fund is not guaranteed and may change over time. The lowest category does not mean a risk-free investment.

This sub-fund is in category 4, since the share price has a moderate volatility and therefore the risk of loss as well as the expected reward is generally medium.

The management techniques applied under normal market conditions may be ineffective under unusual market conditions.

The following risks may not be fully captured by the risk and reward indicator :

Market risk : The sub-fund is subject to fluctuations on the financial market and the inherent risks in any investments in transferable securities. Because of this, the realisation of the sub-fund's objectives cannot be guaranteed if the amount recovered is lower than the amount invested. In addition, the sub-fund may employ techniques and instruments used for purposes other than hedging. Such instruments have a higher degree of risk than investments in transferable securities.

Liquidity risk : Some securities may be difficult to sell at a price and within a period of time desired by the Investment Manager.

Counterparty risk : This sub-fund may lose value if an entity with which it conducts operations becomes unable to meet its commitments.
