What is this product?

TYPE OF PRODUCT

The product is a Sub-Fund of Planetarium Fund, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Sub-Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

OBJECTIVES

The aim of this Sub-Fund is to outperform a "customized benchmark" (FTSE MIB Index 70%, FTSE Italia Mid Cap Index 25%, FTSE MTS Ex-Bank of Italy BOT Index 5%) over the medium term, choosing Italian stocks on the basis of fundamentals and tactical management.

The Sub-Fund is actively managed in reference to the customized benchmark. The manager may deviate to a material extent from the benchmark in terms of securities and weightings.

The Sub-Fund is primarily invested at least 75% in equities or other similar securities (such as convertible bonds) in companies that have their registered offices in or conduct the majority of their business in Italy.

The Sub-Fund may invest up to 5% of its net assets in contingent convertible bonds.

The Sub-Fund may hold Ancillary Liquid Assets (up to 20% of its net assets) in order to cover current or exceptional payments or for the time necessary to reinvest those Ancillary Liquid Assets in eligible assets. It may also invest in deposits and money market instruments.

The Sub-Fund may also invest up to 10% on its assets in the units of UCITS and other UCI.

The Sub-Fund may invest up to 10% of its net assets in SPACs that are eligible and qualify as transferable securities within the meaning of Article 1 (34) and Article 41 of the 2010 Act and Article 2 of the 2008 Regulation.

In order to manage foreign exchange risks, investments in currencies other than the portfolio's reference currency may be hedged.

The Sub-Fund will use Securities Lending transactions to generate additional capital or income up to 100% of the Sub-Fund's net assets (expected percentage is 30%).

Sale of shares in the Sub-Fund can be made on any business day.

Please refer to the Prospectus for more information about the Sustainable Finance Disclosure Regulation ("SFDR") classification of the Sub-Fund.

Any income arising from the Sub-Fund's investments is reinvested and reflected in the value of your shares.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 371	EUR 2 052
Annual cost impact (*)	3.7%	3.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.4% before costs and 0.7% after costs.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.
